Re: NOTICE OF SURVEY – FY11 Miscellaneous East Cobb Water Main Replacement  
CCWS Project No. W2217

Dear Property Owner:

Engineering surveys are being performed in the vicinity of your property to assist the Cobb County Water System in designing the FY11 Miscellaneous East Cobb Water Main Replacement. The purpose of this project is to replace old asbestos-cement and/or PVC water mains with new ductile iron pipe mains, including new valves, fire hydrants, and customer service connections.

This work will, for the most part, take place within the public right-of-way of the street, but it may be necessary for engineering and survey personnel to enter your property to accomplish ground surveys and engineering data collection for design purposes. The survey base line may be marked with paint on the pavement or with stakes driven into the ground within the right-of-way; however, there will not be any damage to real estate, fruit or nut trees, shrubs, flower beds, or gardens by the survey personnel.

We will do our best to minimize any inconvenience to you. Any inquires concerning this survey should be directed to:

Cobb County Water System  
Tim Steenhoek  
770-419-6330  
770-419-6335 (Fax)

Engineering Strategies, Inc.  
Pedro Rossello, P.E.  
770-429-0001, Ext. 121  
678-205-2840 (Fax)

Your input concerning physical features associated with your property is desired and welcomed. Any additional information will enhance our database and increase our ability to anticipate field conditions before construction begins. If convenient, please complete and return the enclosed form.

Please note that any construction activities that encroach upon private property will require a grant of easement from the property owner before the construction work begins. If it is anticipated that your property will be impacted, you will be contacted individually at a later date. Thank you for your cooperation and consideration in this matter.

Sincerely,  
COBB COUNTY WATER SYSTEM  
Engineering and Records Division

Judy B. Jones, P.E.  
Division Manager

**SURVEY NOTIFICATION ACKNOWLEDGEMENT**

Re: NOTICE OF SURVEY - FY11 Miscellaneous East Cobb Water Main Replacement  
CCWS Project No. W2217

We would appreciate your input with information that would assist in the development of the design for this project. Please let us know of the presence and/or location of any underground facilities on your property and within the road right-of-way between your property and the street. Facilities of interest would include a septic tank and drain field, lawn sprinkler piping, "invisible fencing" (pet containment systems), utility service connections, yard light wiring, etc. A sketch of the approximate location of any known features will be appreciated. The space below may be used, or a separate sheet may be attached. Thank you for your assistance.
